Education

Hi-Tech Institute of Engineering and Technology

Dr. APJ Abdul Kalam Technical University, Lucknow

Nov 2021 – Jun 2025

Guru Gorakhnath Vidyapeeth Bharohiya Gorakhpur

Intermediate Percentage: 68 | High School Percentage: 72

Apr 2016 – Apr 2020

Technical Skills

- **Languages:** C language, Core and Advance JAVA, HTML, CSS, JavaScript, SQL
- **Developer Tools:** VS Code, Github, Eclipse, Maven
- **Database:** Oracle, PostgreSQL, Hibernate, JDBC, JPA
- **Frameworks:** Bootstrap, Hibernate, Collection, Spring, Jpa
- **Area of Interest:** Software Development

Internship

Appsquadz Software pvt. ltd.

Sep 2024 - Mar 2025

Location: Noida

Software Trainee (JAVA Technology) / Certificate

Work on a Ecommerce Project and learn about the working and implementation collections framework, working with object in java, doing CRUD operations using servlet and in my internship period, I also work on the live project for managing students in an organization, where I learn to manage data using Hibernate ORM.

Projects

Organization Student Management System

Jan 2025

Tools & Technologies: HTML, CSS, Java, Servlets, PostgreSQL, Tomcat

- Designed and developed a web-based application to manage student information and streamline administrative processes.
- Implemented student registration, data retrieval, and profile management features using Java Servlets and PostgreSQL.
- Built an interactive UI with HTML & CSS, enabling admins to create, update, and delete student records efficiently.
- Deployed the project on Apache Tomcat Server, ensuring scalability and secure data handling.
- Improved organizational workflow by reducing manual data entry and providing a centralized system for student management.

Customer Management Tool

Aug 2025

Tools & Technologies: Spring Boot, React, Maven, PostgreSQL

- Built a full-stack customer management system with Spring Boot (backend) and React (frontend), integrated with PostgreSQL for persistent data storage.
- Implemented CRUD functionalities to create, update, and delete customer records with secure data handling.
- Developed features for automated workflows including welcome emails, invoice generation, and invoice delivery.
- Enabled document storage and management (agreements, proposals) for each customer, ensuring easy access and organization.
- Designed a powerful search module to quickly retrieve customers by name, email, or company name.
- Enhanced productivity by automating repetitive tasks and centralizing customer-related information into a single platform.

Declaration

I ensure that the information provided in my resume is true and fair in my knowledge.
